

Short bio:

Ilia Stambler, PhD, is the Chief Science Officer and Chairman of Vetek (Seniority) Association – the Movement for Longevity and Quality of Life, Israel <http://www.longevityisrael.org/> and acting chairman of International Longevity Alliance (ILA) <https://longevityalliance.org/>. He is a fellow at the Department of Science, Technology and Society, Bar-Ilan University, Israel. His research has focused on the historical and social implications of aging and longevity research, including ethical, policy and regulatory implications. He has also been involved in mathematical modeling of aging and aging-related diseases. He is the author of the books “A History of Life-extensionism in the Twentieth Century” and “Longevity Promotion: Multidisciplinary Perspectives” and over 70 academic papers (journal articles and book chapters) <https://www.longevityhistory.com/>.

He is actively involved in advocacy for aging and longevity research, serving on the boards of several national and international organizations for healthy longevity research and advocacy, including ISOAD, BGRF, GHPI, ESAAM. He has initiated, organized or played an active part in several national and international advocacy and educational campaigns for healthy longevity, such as the “International Longevity Day and Month” campaign, the campaign for “Enhancing research, development and education for healthy longevity and prevention of aging-related diseases” in Israel, the successful campaign for the inclusion of aging into the WHO work program, and others.
